WHY TIMMINS

We Bridge the Tech Skills Gap between Industry & Academia.
RESKILL, UPSKILL, HIRE, ONBOARD & UPGRADE in Niche Technology with Timmins.
Anytime, Anywhere.

The Tech Skills Gap is the difference between job seekers' skillset and the actual tech skills that industries require. The increasing demand for tech triggered by the Covid-19 crisis has caused this gap to widen at unprecedented levels.

We at Timmins understand that reskilling, upskilling, hiring, and upgrading in new technologies are now no longer optional but core business requirements. This is why all our programs are practical and based on real-work examples.

We specialize in creating highly customized training, consulting, and staffing solutions in new technologies. Designed by subject matter experts, our unique program methodology offers a blend of both theory and practice.

800

A recent McKinsey global survey of 800 executives suggests that a disruptive period of workplace changes lies ahead, driven mainly by automation and digitization.

70%

70% of C-suite level respondents to a 2020 UiPath survey say they now want even non-technical employees to have some niche tech skills.

OUR SERVICES

Corporate Training

We create customized learning experiences for your teams while keeping in mind your business goals and workplace culture.

IT Staffing

We ensure that the staff we provide are not just 'qualified professionals' but also highly efficient candidates that can actually get the job done.

Software Consulting & Development

Our niche software engineers are available to help you identify, test and adopt or develop highly specialized software for your business.

Public Courses

We offer beginner to advanced level LIVE online public courses developed and delivered by top industry & academic experts.

CORPORATE TRAINING SOLUTIONS

OUR CASE STUDIES

We are a niche technology partner that equips businesses across industries to take full advantage of breakthrough technologies and accelerate their digital transformation.

Case Study #1

Niche Technology Training for Mobile Chip
Development

5G Mobile System on Chip (SoC) Technologies Development

Summary: Assisting innovation teams of a global leader in semiconductors and wireless technology to bring their cutting-edge technology ideas to life. Through this ongoing intervention, we train participants to design, develop, implement, test, and deploy 5G-related technology solutions for premier Mobile handset OEMs. The 5G handsets are primed to boast powerful camera (4K, 8K video capturing), state-of-the-art AI, and desktop-like gaming experiences.

Case Study #2
Staffing, Training & Consulting for
Android Smartphone Development

Android Mobile Development Project

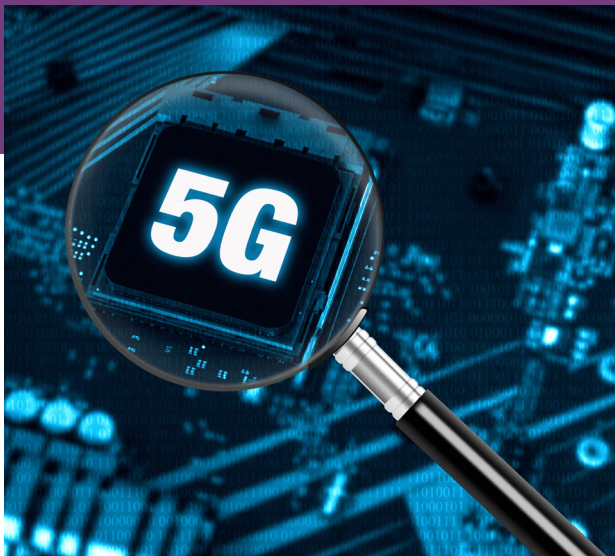

Summary: Upskilling, reskilling, onboarding, and training program for equipping Malaysian manufacturing teams of a leading global semiconductor company to develop Android Mobile Handsets with Qualcomm chipsets. This ongoing program is conducted by eight senior trainers with a combined experience of 170 years.

Case Study #3
Artificial Intelligence Program

Machine Learning Program for Data Analytics

Summary: Supporting tech teams of a leading bank in Singapore with customized knowledge on Data Analytics to develop their own homegrown code for in-house data analysis. This program helped equip the related tech team on analytics through Python programming language and interface with the SAS software.

Case Study #4
Telecommunications Training

5G Technology Program

Summary: Raising awareness on 4.5 and 5G technology among senior engineers and C-suite executives of leading Southeast Asian telecom companies. The program specially covered network redeployment in New Radio, new towers, and backhaul fibre optics.

Case Study #5
Niche Tech Staffing

Staff Augmentation

Summary: Providing Niche tech staffing for a Malaysian Semiconductor Company. The project involved acquiring, evaluating and preparing full-time and on-contract staff for highly specialized niche tech projects of client company.

OUR CORE VALUES

“Sharing knowledge with individuals and businesses that add value to the world is – and will always be – the need of the hour.” – Raj Rajaratnam, Timmins Founder & CEO .

Our core values are based on what we truly believe makes a company great: passion, integrity, innovation, credibility, and service excellence.

Our Mission

To deliver timely, targeted and transformative training, consulting, and staffing offerings in niche technology.

Our Vision

Our vision is to create training, consulting and staffing experiences in niche technology that add value to not just growth-driven businesses, but the global technology fraternity and the world at large.

Our Philosophy

We believe in supporting our clients with personalized knowledge-sharing solutions that equip them to meet their specific niche tech requirements and goals.
